

FAASTeam presents:

NW Mountain Virtual Aviation Safety Week - March 25 2021 - Day 3 - Session 1

Dr. Edwards will discuss the statistics for eventual medical certification, dispelling the myth the FAA “wants to deny you because you are old.” He will also discuss the reasoning behind requirements for some medical testing - given that the aging population of pilots have a higher likelihood of aero-medically significant cardiovascular, visual and neurological diseases. This population also experiences a higher likelihood of using prescription drugs that potentially affect performance in the cockpit. Advice is given for maintaining the medical certificate and what to do when a deferral occurs.

Directions: This Virtual Aviation Safety Event will be hosted using the Goto Webinar platform.
Goto Webinar registration link:
<https://register.gotowebinar.com/register/6521250057085355787>

Once registered, you will receive an email confirmation from the Goto Webinar system platform with joining the webinar information for each topic you have registered. Thank you for your participation.
